

1897.

Academy Architecture.

HEATING APPARATUS.

GRUNDY'S PATENT

(Greatly Improved),

For Warming and Ventilating Churches, Chapels, Schools, and
other Buildings.

MORE THAN FOUR THOUSAND PLACES OF WORSHIP HEATED
WITH PURE WARM AIR.

*Is Superseding other Plans, is less Costly, produces more Heat, and consumes less
Fuel than any other System.*

SUCCESS GUARANTEED.

*N.B.—For Apparatuses erected during the Summer Months, credit for HALF the cost
will be given until January following, so that they can be tested in Cold Weather,
and if not perfectly satisfactory, the Apparatus may be returned any time within two
years of its erection, and the money will be refunded.*

THE Apparatus is very durable, safe (no risk of fire), easy to manage, and not liable to
get out of order. The air is heated in an air chamber, usually constructed in a vault
under or near the Church, and passing through a flue comes in through an iron grating in
the floor of the Church. At the same time the Apparatus draws out, through other gratings
the cold air. By this plan, marvellous in simplicity, the entire Church is brought to an even
temperature.

In the summer a constant supply of cold fresh air passes into the Church, through the
grating in the floor, and through the gratings supplied for the admission of fresh external air to
cool and ventilate the Church.

APPLY TO
JOHN GRUNDY,
30 Duncan Terrace, City Road, London, N.

Works : TYLDESLEY, near MANCHESTER.

ACADEMY ARCHITECTURE

AND

Annual Architectural Review, 1891.

EDITED BY

ALEX. KOCH, Architect,

WINTER WARMTH AND COMFORT.

HEATING APPARATUS.

GRUNDY'S SPECIALITY.

PURE WARM AIR.

Upwards of One Thousand Testimonials received.

Combination of Pure Warm Air and Hot Water, as supplied to LONDONDERRY CATHEDRAL, TRURO CATHEDRAL, CARDIFF NEW CATHOLIC CATHEDRAL, KILMORE CATHEDRAL, QUEEN'S SCHOOL CHAPEL, Eton, STANLEY CATHEDRAL, Falkland Islands, and Board Schools.

From GENERAL DE TESSIER, Fetcham Grove, Leatherhead. *May 7th, 1888.*

General De Tessier has the pleasure to enclose a cheque on Messrs. Coutts and Co., on account of the warm air apparatus. It has answered all the purposes required of it, and the bulk of the house is well warmed throughout. He would mention that the velocity of the hot air was, after some experiments, found to be about 2½ miles per hour with an ordinary fire. On the whole, he is very pleased with finding it work so effectually and with great simplicity.

Woodthorpe, Shepherd's Hill, Highgate, London, N. *May 20th, 1889.*

MR. JOHN GRUNDY.—Dear Sir,—I am very pleased with the warm air apparatus that you have fitted in my house, which has resulted in comfort and convenience to my household quite beyond my expectation.

The luxury of maintaining an even temperature throughout the house in cold weather, while at the same time introducing warmed fresh air from the outside, thus reversing the usual winter experience of stagnant air caused by shut doors and windows, really robs an English winter of one of its most unhealthful features.

The basement room in which the furnace is placed I now often use as a Turkish bath, and I feel I can easily get any temperature I like up to 180 degrees.—Yours truly, H. KENNETH.

Dr. SCOTT, Swettenham, Congleton. *January, 1889.*

If people with delicate lungs would adopt your admirable patent for warming their dwelling houses, they would no longer be compelled to visit more genial climes as the winter approaches. I have found it so, and cannot express my sense of gratitude to you for the invention. Would that it were better known, and could be made cheap enough for all classes to avail themselves of it.

Dr. ROBERTSON, St. Ann's, West Dulwich, London. *February, 1889.*

Sir,—Since the introduction of your valuable patent for warming and ventilating my private house, I have enjoyed the greatest possible comfort. The house throughout is delightfully free from draughts and damp.

It is just the kind of apparatus that people with weak chests ought to adopt.

It is indeed a public boon. Invalids need never wish to winter abroad if they employ a "Grundy" Warmer.

Dr. TWIBILL, of Kiltegan, Co. Wicklow. *March, 1889.*

So pleased are the members of my family with your grand system of warming houses by a diffusion of pure warm air, that the ladies wish you would call, that they personally may thank you for so adding to the comfort of the home. The sooner the better your admirable invention becomes known to the community at large. It is everything that can be desired.

Dr. A. J. HOBART, of 33 South Mall, Cork. *Nov., 1889.*

Your system of heating houses by pure warm air is admirable. To delicate persons it is invaluable. Whenever I am consulted as to the best means of warming and ventilating public or private buildings, I do not fail to recommend the "Grundy."

From HEATLEY NOBLE, Esq., Temple Coomb, Henley-on-Thames. *Nov., 1889.*

I think it right to let you know that your patent works well at my house. I am perfectly satisfied with it. Since I caused the damper to be altered the apparatus does not want half so much attention.

35, Saxe-Coburg Street, Leicester.

MR. GRUNDY.—Dear Sir,—I have much pleasure in expressing my satisfaction with the apparatus you fixed in my house. It warms the several rooms, hall, &c., on the ground floor perfectly, and the air passing upstairs renders the bedrooms very pleasant. The apparatus keeps the house much warmer, drier, and far more healthy and agreeable than would be the case if the rooms were heated by ordinary fires, and at far less cost for fuel. I may add, it is universally praised by visitors to the house, who are delighted with being able to sit anywhere without feeling the slightest draught, and with the purity of the air they breathe.—Yours truly,

F. REDFERN (*Author of "Edeography"*).

Walden, Chislehurst.

MR. WYLLIE has much pleasure in testifying to the thorough efficiency of Mr. John Grundy's heating apparatus. Previous to its introduction he found the house cold and damp, and requiring many fires to heat it. Now, comparatively few fires are required, and the house is perfectly dry and comfortable.

Argyll House, Clifton, Bristol.

Dear Sir,—I am perfectly satisfied with the warming of my house by your patent. I had not the least doubt but that it would answer the purpose all right, for I had watched its progress at the Seamen's Institute, where it also works admirably.—Faithfully,
W. F. LAVINGTON.

From Admiral the Honourable G. DOUGLAS, Nusells, Royston. *Dec. 27, 1888.*

Sir,—I have much pleasure in stating that the heating apparatus put up by you in this house works most satisfactorily. There is nothing the least unpleasant in the warm air, and the consumption of fuel is small.

To Mr. JOHN GRUNDY.

HENRY HOPE

HORTICULTURAL
BUILDER, & HEATING
ENGINEER.

HEATING
APPARATUS,

For all kinds of
BUILDINGS,
on the newest and
most perfect systems.

Architects' designs carried out for Conservatories, Hot Houses, &c., with the most approved forms of Heating and Ventilation.

In Course of Publication, Parts One and Two Now Ready.

To be completed in Six Parts, each containing Twenty-two Plates, Eighteen of which will be reproduced from Photographs specially taken for the Work; the others will be from Drawings by the Authors. With Letterpress illustrated by numerous Sketches.

ARCHITECTURE OF THE RENAISSANCE IN ENGLAND:

ILLUSTRATED BY A SERIES OF VIEWS AND DETAILS FROM BUILDINGS ERECTED
BETWEEN THE YEARS 1560—1630, WITH HISTORICAL AND CRITICAL TEXT;

BY

J. ALFRED GOTCH, F.S.A., F.R.I.B.A.,
AUTHOR OF "A COMPLETE ACCOUNT OF THE BUILDINGS OF SIR THOMAS TRESHAM."

ASSISTED BY

W. TALBOT BROWN, A.R.I.B.A.

The Size of the Plates is 14 in. by 10 in., on Fine Paper, 19 in. by 14 in.

The Price to Subscribers is 21/- per Part, nett, in Portfolio; to Non-Subscribers, 25/-.

The remaining Parts will be issued at intervals of about Two Months.

"The plates are very attractive, and should be full of instruction for professional students of architecture, as well as for all admirers of an art in which modern England has so much to learn from the past."—*The Times*.

"The reproductions are very good and represent the details of the buildings with great sharpness, as well as the texture of the stones and the incidents of light and shadow."—*The Builder*.

"For the general design and execution of the part before us we have nothing but praise. Within the limits which the authors have assigned to themselves we know of nothing to compare with it."—*The Daily News*.

"The first part well realises the promises with which it was announced. . . . The photographs were all specially taken for this fine work, and the plates in the first part are all well executed."—*The Building News*.

"A book the publication of which will certainly rank as one of the chief events of the architectural year."
—*The Artist*.

"The book is admirably produced, and leaves little to be desired in respect of choice paper, type, and quality of printing, both of plates and letterpress. . . . The photographic work is very good in expressing the detail with clearness and precision."—*The British Architect*.

WILDERNESS WORKS, WREXHAM.

Terra-Cotta in Red, Pink, Buff, and Orange Brown.

THE Wilderness Terra-Cotta is an honest and beautiful material for building, in substance indestructible, with a hard surface, impervious to moisture, and unaffected by acids or atmospheric impurities. All the Wilderness Terra-Cottas are burnt their natural colours. No colouring matter is used in manufacture, nor are the goods "dipped" or "washed." The surface is that left by the tool, and the colour that made by the direct action of the fire on the oxides of iron contained in the clay. The Works are fitted up with the newest and best machinery for expeditious and large production, and are connected with the Great Western Railway main line.

Architects are invited to visit the Works, which are situated one mile and a half from Wrexham Station.

Samples will be sent on application.

Among other buildings now in course of erection, constructed, wholly or in part, of the Wilderness Terra-Cotta are the following—
